Certified Training Center

INCLUSIVE® CUSTOM ABUTMENTS

Design custom implant abutments and then output to your own milling machine or partner with Glidewell to outsource Inclusive Custom Abutments, BruxZir Solid Zirconia or PrismaTik Clinical Zirconia™ copings. Send your abutment design for CAM output and receive an Inclusive Custom Implant Abutment with a matching zirconia coping or crown wax-up.

\$99* per

Titanium Abutment from
your wax-up or 3Shape
AbutmentDesigner# file

\$129 – Modelwork

\$129* per

All-Zirconia Abutment
from your 3Shape
AbutmentDesigner# file

\$139 – Modelwork

\$129* per

Zirconia Abutment with Titanium
Insert Abutment from your
3Shape AbutmentDesigner# file

\$139 – Modelwork

\$40 per

3 mm Titanium Insert (pictured
Lab Screw and milled zirconia
abutment NOT included in price)

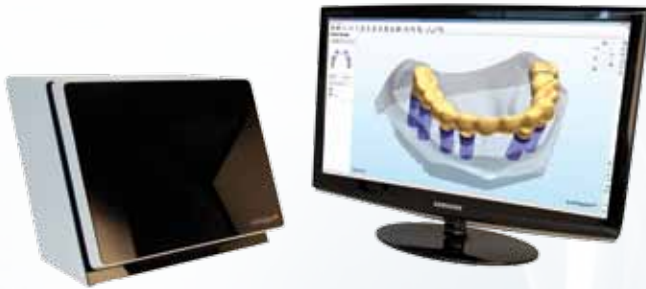

Inclusive Titanium Abutments and Zirconia Abutments with Ti-Insert are compatible with Neoss, NobelReplace#, NobelActive#, Brånemark System# RP, Straumann# Bone Level, Biomet 3i# Certain#, PrimaConnex# and Zimmer Screw-Vent#. Inclusive All-Zirconia Abutments are compatible with Biomet 3i# Certain#, Zimmer Screw-Vent# and NobelReplace# implant systems, in all sizes.

* Plus \$7 shipping each way. With a design file, there is only a return shipping fee.

■ Complete Basic Package: starting at \$31,000

Choose between the D700/D710 Scanner. Complete basic package includes the scanner of your choice as well as DentalDesigner# software, PC/monitor/keyboard/mouse, three-day hands-on private training course valued at \$2,995 and unlimited scans. The 3Shape Dental System offers:

- The most advanced 3D scanning technology
- Easy-to-use CAD package and management software
- Accuracy, versatility and excellent scan speed
- AbutmentDesigner# module available for an additional \$5,000. Pair with Inclusive Scanning Abutment Kit to retain control of custom implant abutment design
- The D710 Scanner offers multi-die scanning.

The D700/D710 Scanner is a two-camera, 3-axis motion system. The cameras have reduced angles, which allows scanning of impressions and inlays to improve overall accuracy.

The new generation of AbutmentDesigner allows for faster customized abutments. \$5,000 additional cost with 3Shape System purchase. \$99/custom titanium abutment with design file.

Scan of wax-up abutments and wax-up implant bridges for copy milling. The scan can be further modified (e.g., overall reduction or using Sculpt Toolkit).

INCLUSIVE[®]
SCANNING ABUTMENT KIT

Paired with the 3Shape AbutmentDesigner module, this kit allows labs to retain control of the abutment design process and then use Glidewell's precision implant milling services. This powerful combination opens access to custom implant solutions for 20 of the most popular implant platforms while allowing your lab to maintain design control.

For an in-house custom abutment solution, combine a zirconia mill, 3Shape AbutmentDesigner software, the Inclusive Scanning Abutment Kit and Glidewell's 3 mm Abutment to design and mill zirconia abutments on site.

The Inclusive Scanning Abutment Kit is included, at no charge (a \$725 value), when the AbutmentDesigner module is purchased from Glidewell Direct.

As a lab, we know firsthand the impact that expensive implant components have on your bottom line. Glidewell Direct implant components were developed to provide quality, precision implant parts for an affordable price.
